Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 3/2/05 has been entered.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 2, 5 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Morris (5,285,924). Morris discloses, in figs. 1, 4 and 5, a can sealing apparatus comprising a base 32 having an outer perimeter dimensioned to insert into a flip-top can lid opening, a can top 20 having a peripheral flange defining a general flat C-shaped member and a tab receiving port 30 defining in a non-flange region, and wherein the cap base further comprises an interior wall defining a depression (see fig. 1 and col. 2, lines 60-62).

4. Claims 1, 2, 5 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Shock (5,351,853). Shock discloses, in figs. 2 and 4, a can sealing apparatus

Art Unit: 3727

comprising a base 80 having an outer perimeter dimensioned to insert into a flip-top can lid opening, a can top 45 having a peripheral flange defining a general flat C-shaped member and a tab receiving port 55 defining in a non-flange region, and wherein the cap base further comprises an interior wall 90 defining a depression.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 1-2, 5 and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bartz (6,722,518) in view of Shock.

7. Bartz discloses, in figs. 1 and 2, a can sealing apparatus comprising a base 14, a can top 16 having a peripheral flange defining a general flat C-shaped member and a tab receiving port 11 defining in a non-flange region, and wherein the cap base further comprises an interior wall 14 defining a depression.

Bartz does not disclose the base having an outer perimeter dimensioned to insert into a flip-top can lid opening.

Shock teaches a base 85 having an outer perimeter dimensioned to insert into a flip-top can lid opening.

Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the Bartz can sealing apparatus having the base including an outer perimeter dimensioned to insert into a flip-top

can lid opening, as taught by Shock, in order to facilitate of sealing the can opening.

Response to Arguments

8. Applicant's arguments with respect to claims 1, 2,5 and 6 have been considered but are moot in view of the new ground(s) of rejection.
